

**Matoaca District Meeting 2-Citizen Comments/ Staff Response 8/23/12**

<b>Comment #</b>	<b>Comment</b>	<b>Staff Response</b>
1	Has an analysis been done to estimate the amount of revenue that will be realized based upon the Plan recommendations	One of the Plan's goals is to balance residential and economic development growth; Plan also supports phasing of construction of public facilities to support growth
2	Given recent drought conditions, the county should consider developing an additional reservoir along the Appomattox River	The county is studying alternatives to preserve long term water supply and capacity
3	When schools are renovated or replaced will there still be a need for trailers	With projections, it is anticipated that use of trailers will not be necessary. Trailers have been used in the past to address temporary needs due to spikes in enrollment so as not to overbuild to address short term school needs. Plan recommends that temporary structures be removed as soon as permanent classroom space is available.
4	The Plan recognizes existing Greater Richmond Transit Company (GRTC) bus service to the county. Will this service be maintained/expanded in the future?	The county is studying the feasibility of continuing the existing bus service separate from the comprehensive plan .
